

Planet Vogue Instructions

Did you know we have step by step videos on our Facebook page?
Open your camera on your phone and scan the barcode below to access the videos

1. Sanitise nails using The One Spray, push back the cuticles and buff the nails to remove all traces of shine.
2. Size the extension, ensuring it fits from side to side and that there is space between the nail and extension for the gel. Use the sanding roller/Cuticle Away Ball bit the etch the inside of the extension, use dust brush to remove any dust.
3. Apply 2 layers of PN Sticky Bond/ Nail Prep to natural nails.
4. Apply a base coat of Lastik Stick & Stay Gel/ Lastik HF to natural nails and cure under the PN Speciality Dual Cure Lamp for 60sec.
5. Apply a thin layer of Lastik Stick & Stay Gel/ Lastik HF to the etched area inside the extension, apply a small drop of Gel (enough to cover the natural nail and fill the apex gap inside the tip) to the inside cuticle edge of the extension.
6. Apply the extension to the nail, starting at the cuticle, apply down towards the free edge to ensure full contact with the nail and to release any bubbles. Clean any spills with the gel brush saturated with The One before curing. Maintain pressure on the extension to ensure a good seal, flash cure using the Miss Vogue Flash Cure Lamp for 10sec.
7. Once flash cured, repeat on the rest of the hand and then perform a full cure of 60 sec under the PN Speciality Dual Cure Lamp.
8. If desired cut and shape the extensions. Blend the cuticle area using the Planet Vogue Blending Cone, dust and wipe the nails with Acetone and a lint free nail wipe or buff the surface.
9. Apply a float coat of Lastik/ Lastik HF / Lastik PLUS or HF PLUS over entire nail and cure under PN Speciality Dual Cure Lamp for 60sec. Your Planet Vogue Soft Gel Extensions are now ready for colour/art of your choice.
